PS-02: $\varepsilon - \delta$ Proofs, Part II

Topics
• $\varepsilon - \delta$ proofs of polynomial functions
• $\varepsilon - \delta$ proofs of rational functions

Directions: Work independently with no references other than any personal notes (includes photos from any collaborative whiteboard sessions). This will be graded for correctness.

1. $\lim\limits_{x \to -3} \left(x^2 + 4x + 1\right) = -2$
2. $\lim\limits_{x \to 2} \left(x^3 - 7x\right) = -6$
3. $\lim\limits_{x \to 4} \left(\dfrac{x^2 - 16}{x - 4}\right) = 8$
4. $\lim\limits_{x \to -1} \left(\dfrac{x^2 - 7x + 4}{x - 3}\right)$
